World Leaders

Oil Stop Division of American Pollution Control Corporation (AMPOL) is a manufacturer of environmental protection products and equipment. Oil Stop has supplied products to government agencies, port authorities, oil and gas companies, petrochemical plants, mining companies, and private contractors in over 40 countries.

The **OIL STOP** Difference

Oil Stop is a leading innovator in oil spill equipment design

We hold several patents on containment boom designs

Our Auto Boom™ is known and used worldwide

A trusted partner for the U.S. Coast Guard

PRODUCTS

AUTO BOOM

Oil Stop's single point inflation Auto Boom™ was developed to provide safe, quick and efficient containment of floating oil. The unique design makes it possible to store and deploy from a hydraulic reel, up to 2,000 feet of oil spill containment boom.

ADDITIONAL FEATURES

- **Rapid Deployment:** All buoyancy chambers are inflated from a single air source
- **Compact:** On reel storage or Rapid Pack Bundles for easy storage and transport
- **Exceptional Wave Conformance**
- **Positive Buoyancy:** Built into every section to provide flotation prior to inflation
- **Reliable:** No internal springs, check valves or frames to corrode or fail
- **Reduced Labor:** Deployment only requires one operator at the reel
- **Safe:** Low-pressure air source and minimal operator needs
- **Individual Buoyancy Chambers:** Isolated buoyancy chambers
- **Extended Use:** An entire length of boom can be easily inflated from any point during extended deployment applications
- **Accessory Equipment:** Includes reels, hydraulic power packs, blowers, tow bridles, anchor systems, and storage containers

RAPID PACK SYSTEM

Oil Stop developed the Rapid Pack storage system for efficient and rapid deployment at the onset of an oil spill.

SYSTEM FEATURES

- **Rapid Deployment** of Auto Boom without air in chambers
- **Ready-Made** Auto Boom coils for launch without reel
- **Hydraulically Operated** with easy to learn controls
- **Easy Transport**
- **Deployment** from aircraft capabilities
- **Save Deck Space** on offshore platforms and vessels

OIL
STOP

FIRE BOOM

- **First Fire Resistant Boom** for Inflatable Operation
- **Used** in the response to Deepwater Horizon
- **Tested** by the US Coast Guard for Flame Resistance and Security
- **Tested & Operational** for Over 13 Hour burns Over Two days.

PRODUCTS

FAST SWEEP SYSTEM

Oil Stop's Fast Sweep™ System is a rugged boom system constructed of 100% urethane coated material for maximum tensile strength and abrasion resistance.

ADDITIONAL FEATURES

- **The Fast Sweep™** contains oil in currents up to 1.5 knots
- **Rapid Deployment** system fits on a hydraulically driven reel and can be rapidly deployed by three people
- **High Tensile Spectra™** tension member at the mouth of the sweep for added strength
- **Versatile System** can be used with a skimmer and the apex section is removable for attachment of an in line skimmer
- **Fast Sweep™ Booms** are available in sizes ranging from
 - 20" to 72"
 - Freeboard ranging from 8" to 32"
 - Skirt depths from 8" to 40"

ADDITIONAL PRODUCTS

OIL
STOP

Oil Stop specializes in complete package systems with equipment for containment, recovery, storage and decontamination. We offer a full range of oil spill control equipment and complete system packages including oil spill containment booms, liquid storage devices, oil skimmers, boom reels, power packs, inflation blowers, storage containers, and trailers.

Remote Controlled Vessels

Liquid Storage Systems

Shore-Tidal Guards

**Solid Flotation and Permanent
'Husky' Booms**

Our Clients

Oil Stop has established sales partners around the world. We have designed and produced proven oil spill response and protection products and provided on-site training in over 40 countries.
